

## Groundwater Levels and Water-Quality Observations Pertaining to the Austin Group, Bexar County, Texas, 2009-11: Usgs Scientific Investigations Report 2012- 5278 (Paperback)

Filesize: 4.81 MB

### ***Reviews***

*It is in a single of the best book. This is for those who statte there had not been a well worth reading through. Once you begin to read the book, it is extremely difficult to leave it before concluding.*  
(Dr. Barney Robel Jr.)

## **GROUNDWATER LEVELS AND WATER-QUALITY OBSERVATIONS PERTAINING TO THE AUSTIN GROUP, BEXAR COUNTY, TEXAS, 2009-11: USGS SCIENTIFIC INVESTIGATIONS REPORT 2012-5278 (PAPERBACK)**

To save **Groundwater Levels and Water-Quality Observations Pertaining to the Austin Group, Bexar County, Texas, 2009-11: Usgs Scientific Investigations Report 2012-5278 (Paperback)** eBook, remember to refer to the web link listed below and download the document or gain access to additional information which might be have conjunction with GROUNDWATER LEVELS AND WATER-QUALITY OBSERVATIONS PERTAINING TO THE AUSTIN GROUP, BEXAR COUNTY, TEXAS, 2009-11: USGS SCIENTIFIC INVESTIGATIONS REPORT 2012-5278 (PAPERBACK) ebook.

Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.The U.S. Geological Survey, in cooperation with the San Antonio Water System, examined groundwater-level altitudes (groundwater levels) and water-quality data pertaining to the Austin Group in Bexar County, Texas, during 2009-11. Hydrologic data collected included daily mean groundwater levels collected at seven sites in the study area. Water-quality samples were collected at six sites in the study area and analyzed for major ions, nutrients, trace elements, organic carbon, and stable isotopes. The resulting datasets were examined for similarities between sites as well as similarities to data from the Edwards aquifer in Bexar County, Tex. Similarities in the groundwater levels between sites completed in the Austin Group and site J (State well AY-68-37-203; hereafter referred to as the Bexar County index well ) which is completed in the Edwards aquifer might be indicative of groundwater interactions between the two hydrologic units as a result of nearby faulting or conduit flow. The groundwater levels measured at the sites in the study area exhibited varying degrees of similarity to the Bexar County index well. Groundwater levels at site A (State well AY-68-36-136) exhibited similar patterns as those at the Bexar County index well, but the hydrographs of groundwater levels were different in shape and magnitude in response to precipitation and groundwater pumping, and at times slightly offset in time. The groundwater level patterns measured at sites C, D, and E (State wells AY-68-29-513, AY-68-29-514, and AY-68-29-512, respectively) were not similar to those measured at the Bexar County index well. Groundwater levels at site F (State well AY-68-29-819) exhibited general similarities as those observed at the Bexar County index well; however, there were several periods of notable groundwater-level drawdowns at site F...
