This paper will explain central banking in general and then have a closer look on the U.S. Federal Reserve System. After that it will have a look on the European System of Central Banks, continuing with comparing the two systems, looking for the similarities and differences. During my research I read quite a lot of books and articles and after some time I really got interested in the topic. I really wanted to know how all this central banking works, and what kind of system (the American or the European) is the better one. But I also recognised that there are of course plenty of books, dealing with this topic, but everybody seems to have a different opinion, of what is better, what suits the society best. So while writing this essay, I tried to give back what I found interesting and what seems to be the opinion of several people. Unfortunately I could not stick to the required 3000 words, because my topic was so complex and wide, that it forced me to write some more words on it. 40 pp. Englisch.
