Pineapple Press, United States, 2001. Hardback. Book Condition: New. Jim Wilson (illustrator). 229 x 163 mm. Language: English . Brand New Book. Stand on any stretch of Florida coastline and what do you see? A few terns and gulls circling overhead, sandpipers rushing the outgoing tide to see what meals it uncovered, perhaps a dolphin leaping and playing. But the most interesting events happen beyond our sight. A fascinating but largely ignored world thrives within the coastal waters not more than a few yards or, at most, a few miles offshore in the vast Atlantic Ocean and the Gulf of Mexico. As the seasons change on land, so do they in the waters that surround Florida. Seasons of the Sea delves into what creatures come and go in each of the state's six main regions northeast, southeast, the Keys, southwest, the Big Bend, and the Panhandle. In the summer in northeast Florida, for example, sea turtles come ashore to lay their eggs, and human activity is curtailed to protect the hatchlings when they make their run to the sea. In the Panhandle's summer heat, cannonball jellyfish abound. Accompanying the text are artist Jim Wilson's charming illustrations showing, among other creatures, stingrays, tarpon, manatees, sharks, whales, crabs, and oysters in their natural habitat. Florida's sea and coastal creatures spawn, dance, and run to the beat of the seasons changing rhythms. Water temperature, salinity, amount of sunlight, and a host of other factors determined by the seasons tell sea animals the time of the year and the task at hand. you'll be delighted by the intimate details of these creatures' lives. Pregnant northern right whales spend the winter in northeast Florida waters. Their calves are 13 to 15 feet long and weigh between 1,700 and 1,800 pounds...
