Excerpt: . . . 11 However, protection of high-value individual trees remains a valid option, and I have some talking points that were developed by Forest Health Protection, describing some of the insecticides that can be used in protecting high-value trees. The removal of dead trees and other fire fuels have been shown to reduce fire risk in the immediate vicinity of a home or a structure, and is advisable under most circumstances. At the larger regional scale, however, the influence of bark beetle outbreaks on fuel dynamics and fuel behavior is less clear. We know its a very complicated and dynamic process and can vary greatly, depending on many factors, including pre-outbreak stand conditions, and most importantly, weather. Climate will continue to change, and its imperative that we design restoration plans that take into account the effects of new climate on our existing - the organisms that exist in our current eco-systems, including the conifers and the insects. As temperature continues to increase, mountain...
